

a) Identified by starting VA

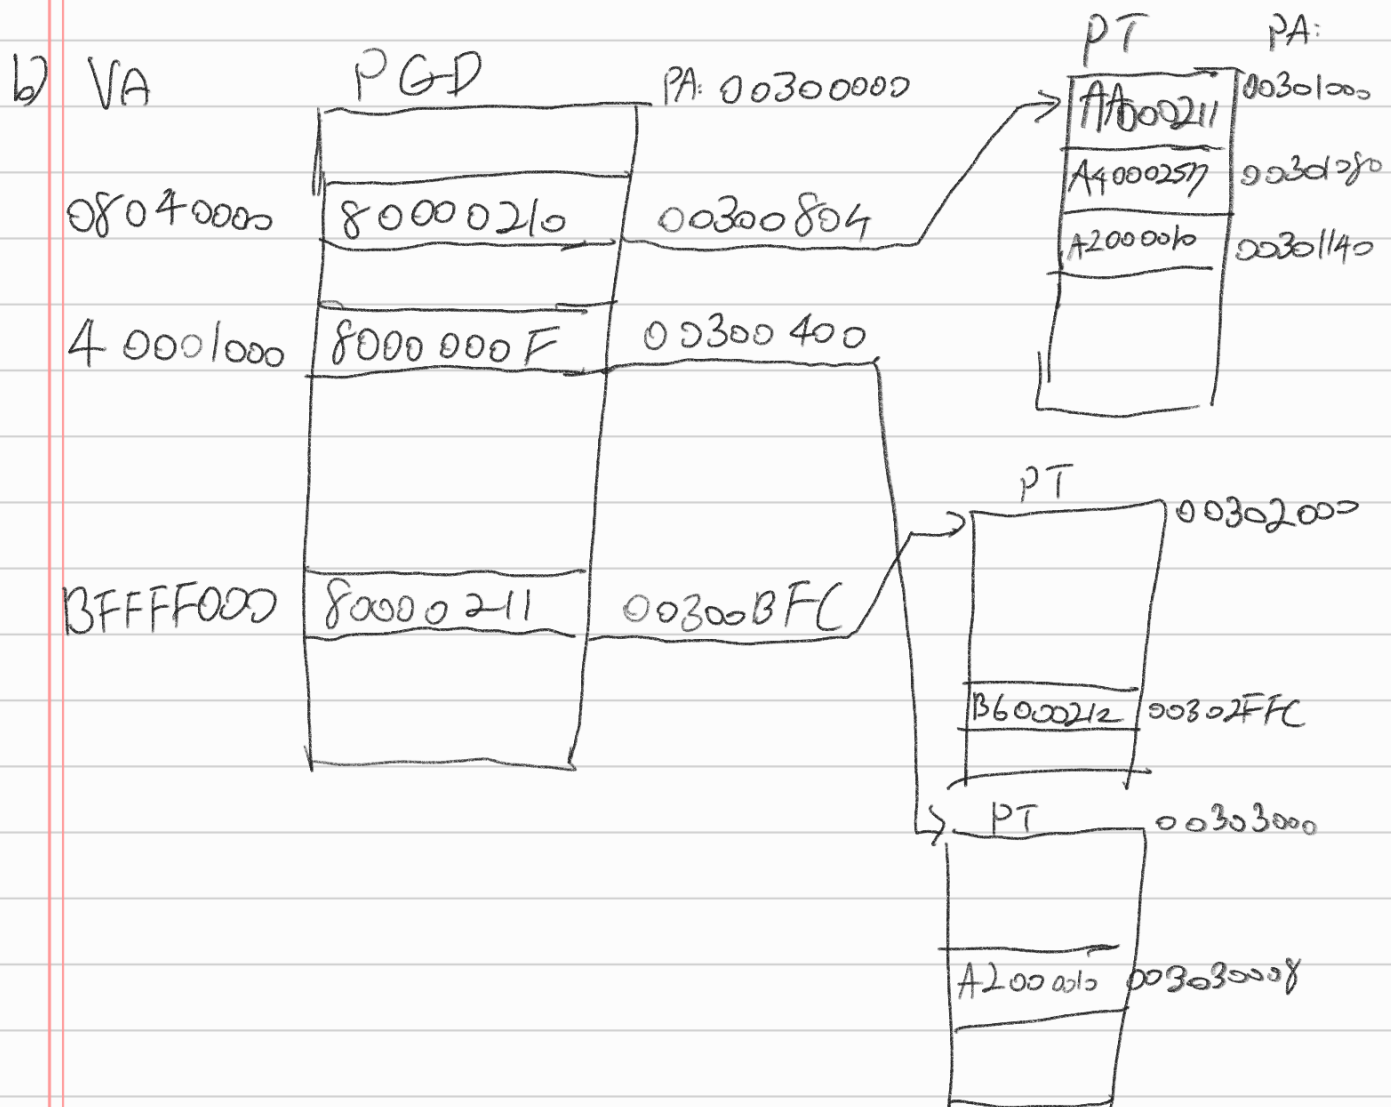

08040000 - text

08042000 - data

08044000 - bss

40001000 - user-specified other

13FFFF000 - stack

c) The user-specified memory region points to the same page frame as that of bss. The next potential candidate is the page frame for the data region, since its accessed bit is off.
